Doosan Infracore America is the fastest developing forklift and lift truck corporation in the North American market, thanks to its outstanding level of product performance and their consistently high level of buyer support and service given to all Doosan Infracore Lift Truck users. The U.S. forklift division situated in Cleveland has a expert team knowledgeable in Product Sales, Purchasing, Marketing, Logistical and Technical Support.

Korea's original domestic lift truck market was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. started to import assembled forklifts as part of a national equipment expansion project. Initial sales of this industrial equipment focused on large business communities, the armed services and on state-run corporations. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to service and sell this heavy equipment. By 1978, a lift truck manufacturing plant was successfully completed. Continuous technical training grew to become the new focus for enhancing quality and product development.

Daewoo began the first home-based forklift business in 1967, and rapidly acquired a whopping 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's progressive technological advancements combined with sales success placed them in a situation of substantial growth of their lift truck business.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a joint enterprise project to respond to competitive pressures in the US materials handling market. This project radically expanded Daewoo's lift truck sales. Construction was finished in 1984 to facilitate a modern plant which helped set up the business for the fabrication of high added-value products suitable for export. In 1993, the corporation had a international sales network and started exporting versions they had established through in-house expertise, as an independent product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into overseas marketplaces.
